# Revolution de L'Automobile

By Dustin Troyan  
Photography by Greg Grudt

What a way to spend a day...celebrating 70 years of Ferrari at Sherwood Country Club for the Revolution de L' Automobile.

For those of you familiar with Sherwood, you know that a more beautiful venue may not exist. Personally, I love spending time at Sherwood. Adding a world-class automotive event to the already incredible ambiance, well, that is near perfection.

"Rev Auto," as the event is also known, has taken different approaches than other events. The idea is to celebrate the "finer things" in one sitting. This approach has led to great success over the handful of years that the event has taken place. Collectors from all over California have celebrated this event by participating and showing their masterpieces. Tens of millions of dollars of automotive excellence were on display for the concours attendees. A more perfect venue for the rarest and most desirable collector cars may not exist.

The event was all inclusive, and Sherwood outdid itself with gourmet offerings, brunch, and dessert bars. You could sip champagne while listening to the Grammy-award-winning trio playing or sit on the patio and enjoy the beautiful grounds and atmosphere. For shopping, there were high-end vendors as well as a silent auction with great offerings from all over the world. A percentage of proceeds also went to support local charities, which was also appreciated by the attendees. The event was an absolute success, and it was an incredible way to spend the day with family, friends, and fellow car enthusiasts.

If you have never attended the event, be sure to mark your calendars for the 2018 event; it is truly a wonderful experience, and I would suggest attending.
